

How to Harden Ubuntu 20.04 with CIS benchmarks?

JShielder is an Open Source Bash Script developed to help SysAdmin and developers secure there Linux Servers.

This tool automates the process of Hardening a Linux server with little interaction from the user.

Look how easy it is to use:

```
./jshielder-CIS.sh
```

Features

- CIS Benchmarking
- CIS Benchmark Hardening

Installation

Install jshielder by running:

- git clone <https://github.com/Jsitech/JShielder.git>
- https://github.com/Jsitech/JShielder/blob/master/UbuntuServer_18.04LTS/jshielder-CIS.sh
- chmod +x jshielder-CIS.sh
