

How to audit your Kubernetes Security compliance with CIS Benchmarks?

`$project`
=====

`$project` will solve your problem of where to start with documentation, by providing a basic explanation of how to do it easily.

Look how easy it is to use:

```
import project
# Get your stuff done
project.do_stuff()
```

Features

- Be awesome
- Make things faster

Installation

Install `$project` by running:

```
install project
```

Contribute

- Issue Tracker: [github.com/\\$project/\\$project/issues](https://github.com/$project/$project/issues)
- Source Code: [github.com/\\$project/\\$project](https://github.com/$project/$project)
